

STILL IN MOTION

Illustrated building instructions

1,606

pieces

250

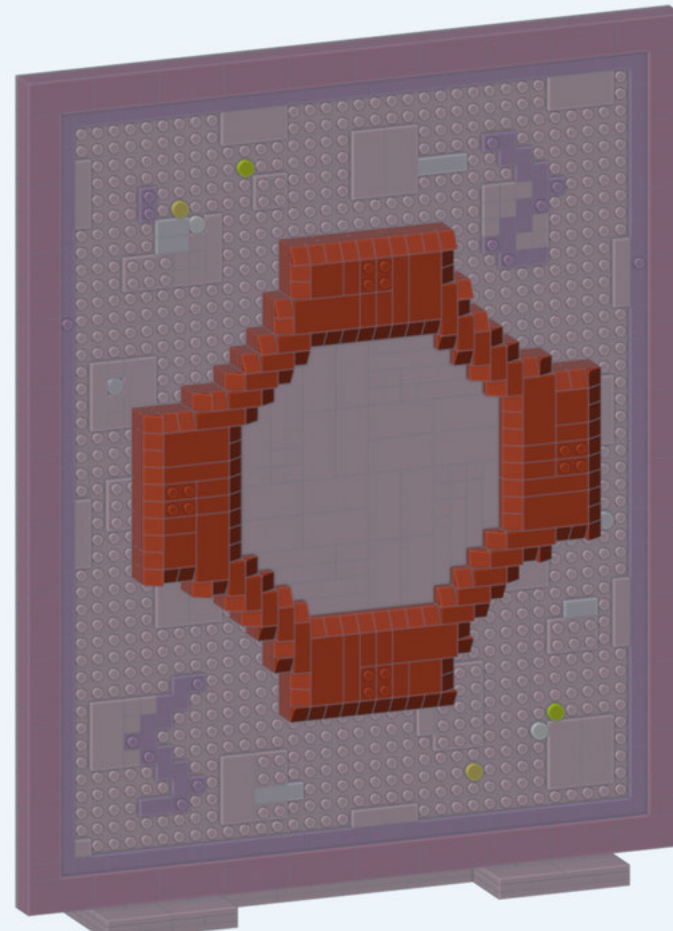

building steps

32 x 40.3 x 12.3 cm

width x height x depth

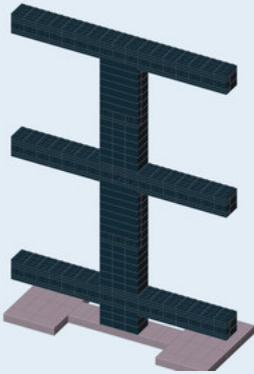

Freestanding portrait with a
manually rotating fal logo.

Custom, unofficial design. Same ordered
model and exact part quantities.

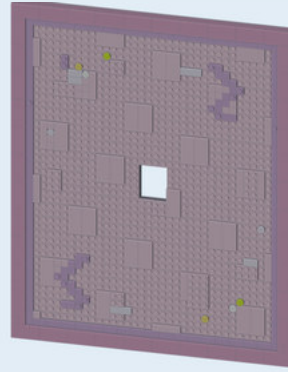

Build at your own pace.

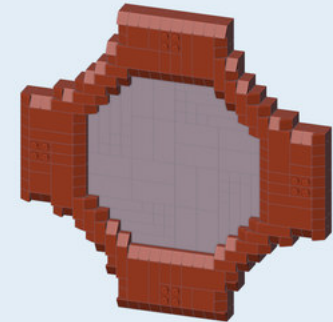

1 Stand

2 Picture

3 Rotor

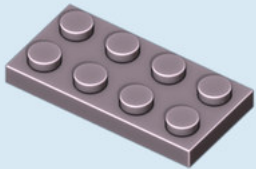

Build the three modules separately, then join them in steps 248-250. Each numbered page keeps the same step number as the coordinate reference and 3D model.

For the loose foundation layers, work on a flat table. Optional full-size paper templates help position the feet, picture and rotor without extra LEGO pieces.

No changes were made to your ordered 1,606-piece design. The digital connections and clearances were checked; real assembly strength and axle friction have not yet been physically tested.

A few simple cues.

Pieces for this step

2x

3020

New pieces

Yellow outlines show what you add on this page.

Turn over when shown

Underside views reveal hidden connections. The caption tells you when to return to the normal view.

Zoom in

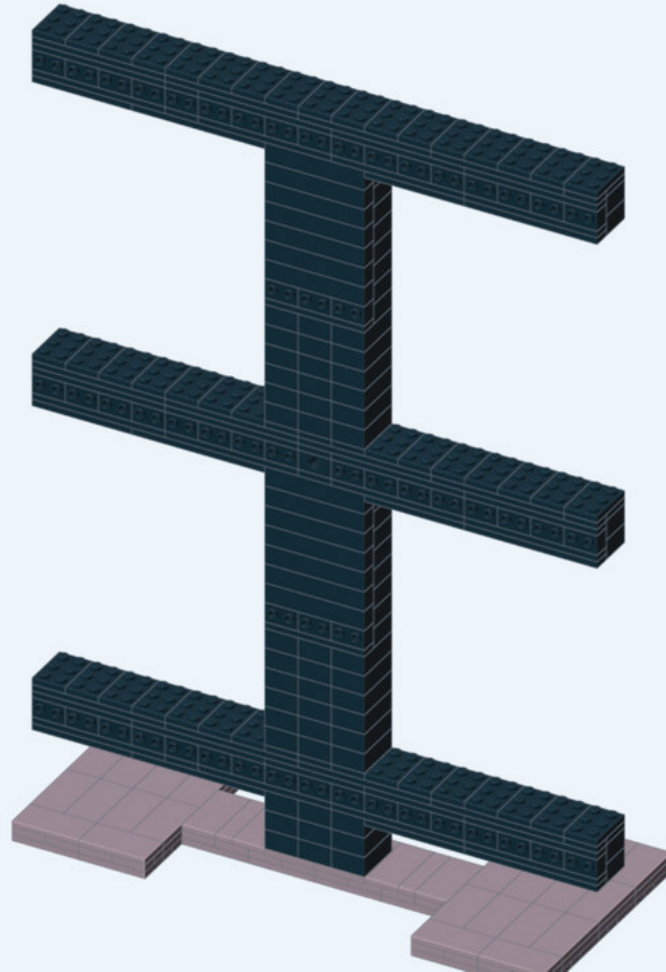

A small whole-assembly view accompanies a larger close-up. Only the close-up may crop surrounding pieces; all new pieces fit inside its view.

Keep the reference nearby

Use the separate coordinate reference if you want an exact stud location. It has matching step numbers. The final inventory gives the exact LEGO element IDs and quantities.

The dark-pink frame, pale-pink picture, red wheel and lavender details use the same colors as the ordered model.

01 / The stand

START

Step 1

461 pieces

The rails and feet support the picture. Keep all side studs facing forward.

248

JOIN THE MODULES

Mount the picture

Align the central opening with the bearing holes. Press the picture onto the forward-facing stud rails, supporting it from the front.

Keep the lower edge just above the pink feet. Work along each rail until the connections sit flush.

No new pieces. Join the completed stand and picture.

249

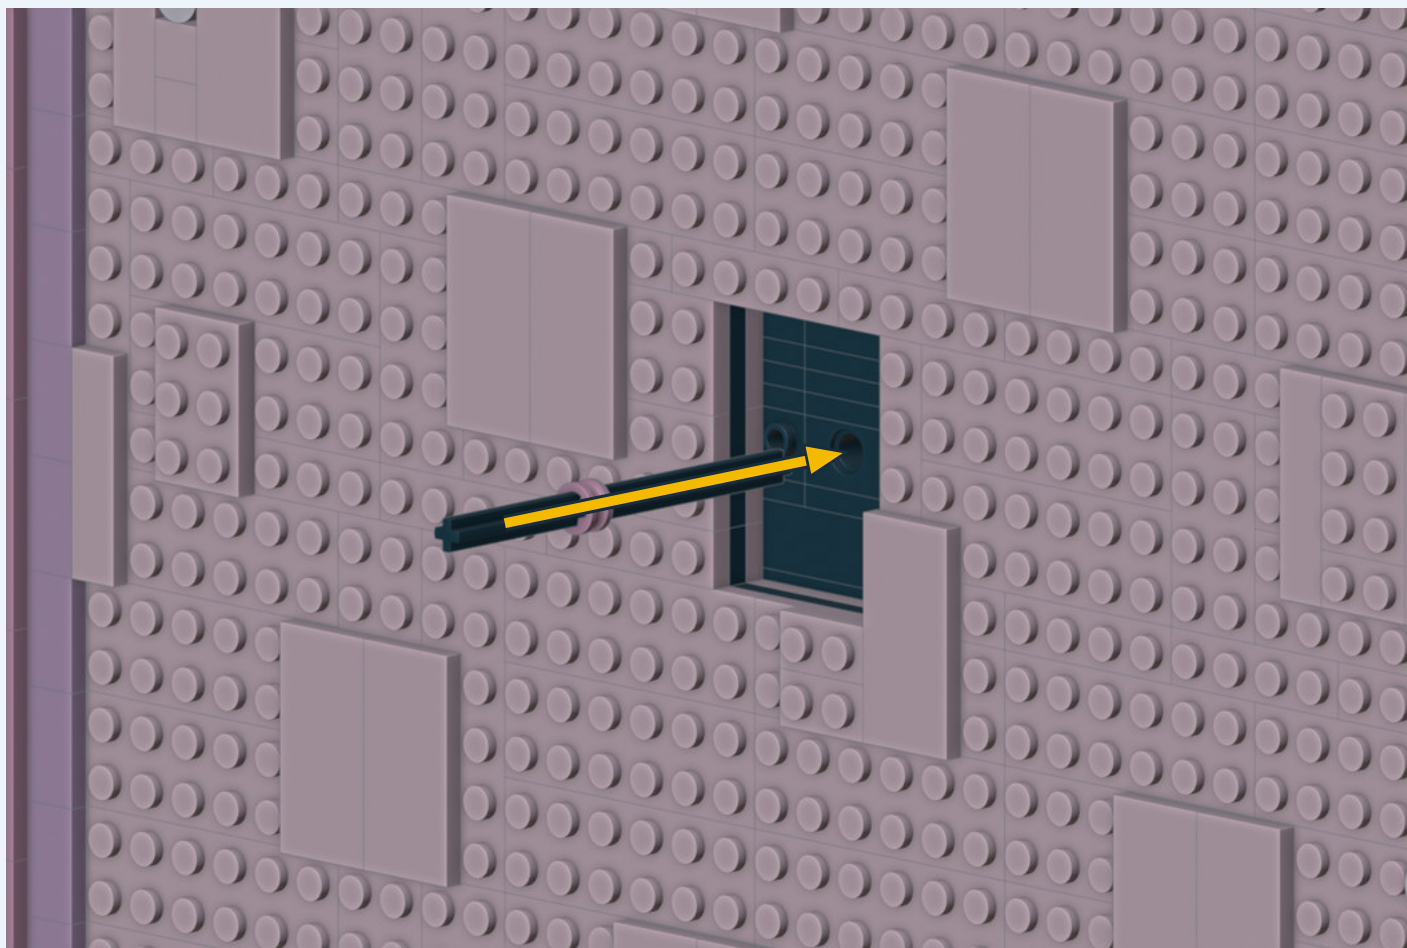

THE SPINDLE

1x 3707
Black

1x 4265c
Dark pink

8L / 64 mm

Actual-size length guide when printed at 100%.

Insert the 8L axle

Guide it through the three round bearing holes from the front. Fit one pink half bush in front of the first bearing.

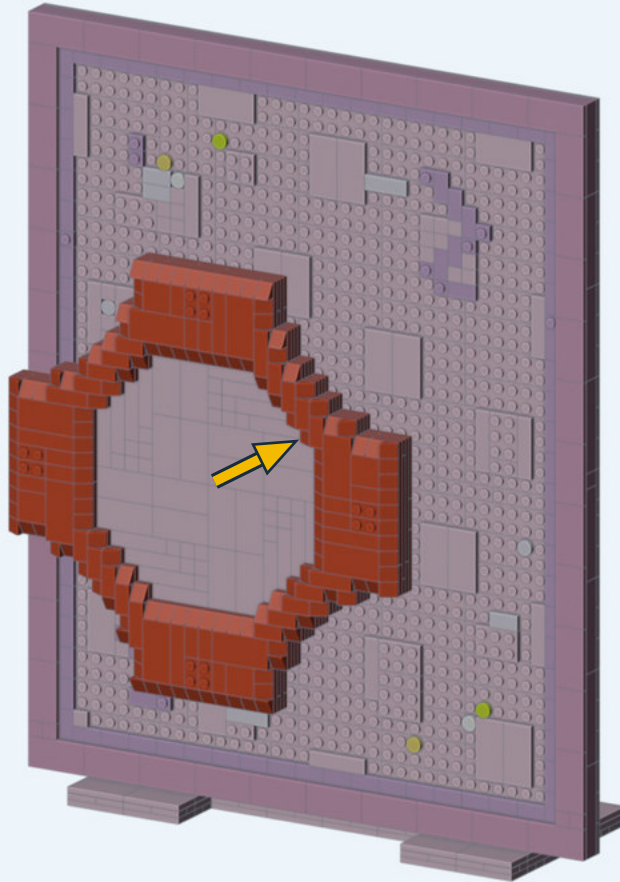

Leave a tiny running gap; the bush should not squeeze against the bearing.

250

FIT THE ROTOR

1x 4265c
Dark pink

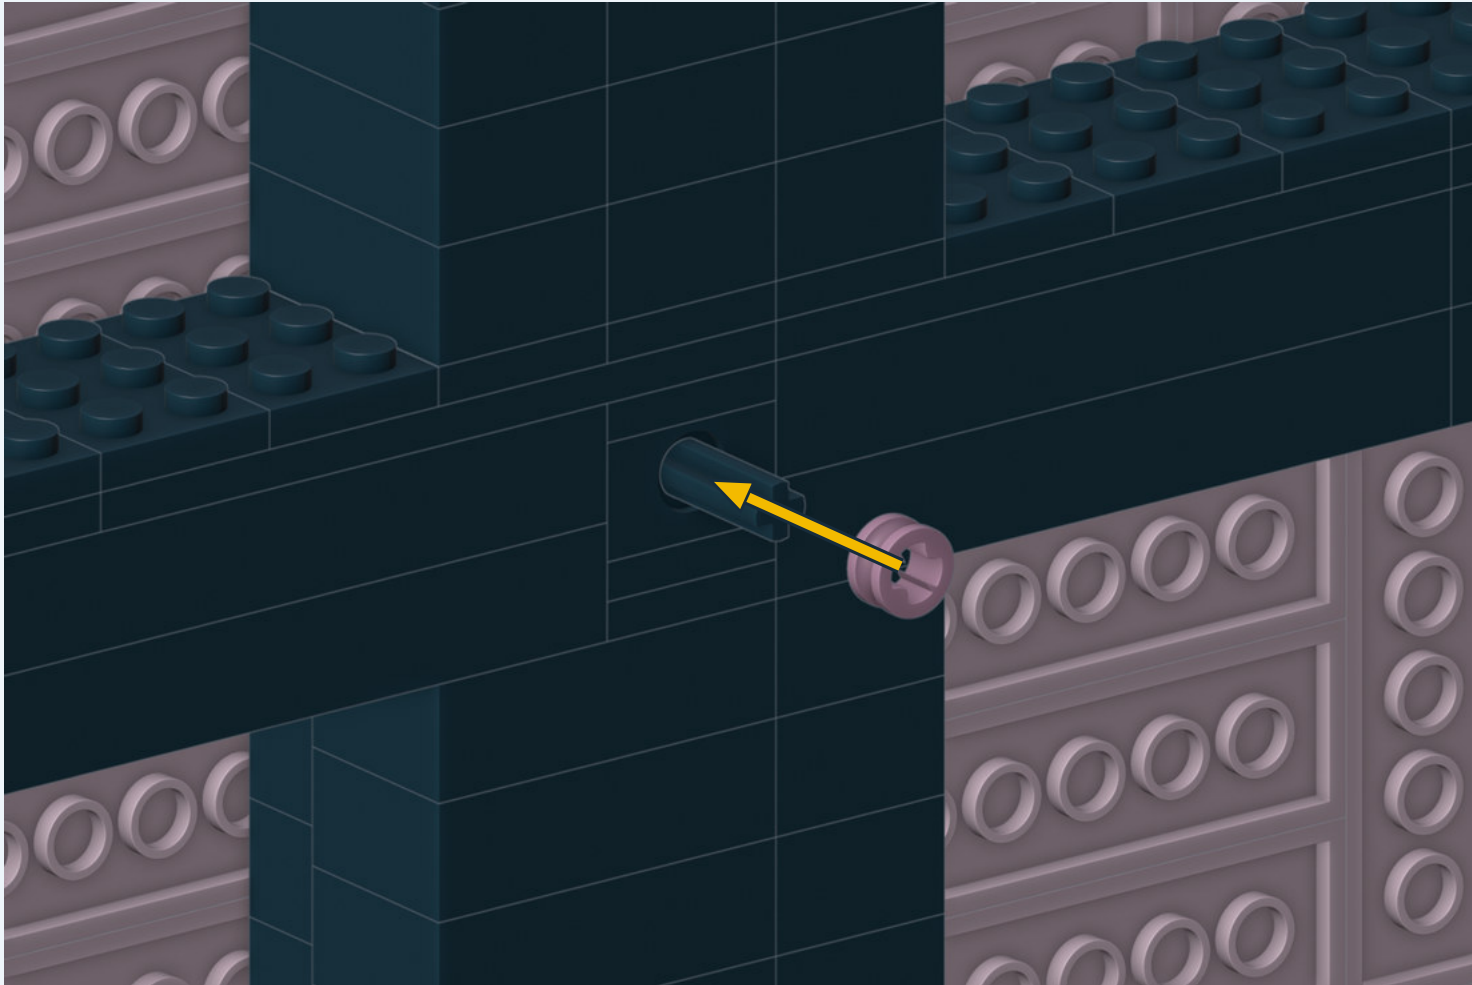

Attach the logo

Push the four aligned red hub plates onto the front of the axle. Support the axle from behind while pressing.

Then fit the remaining half bush on the rear tip. See the next page for the close-up.

Use the completed rotor and the 1 new half bush shown above.

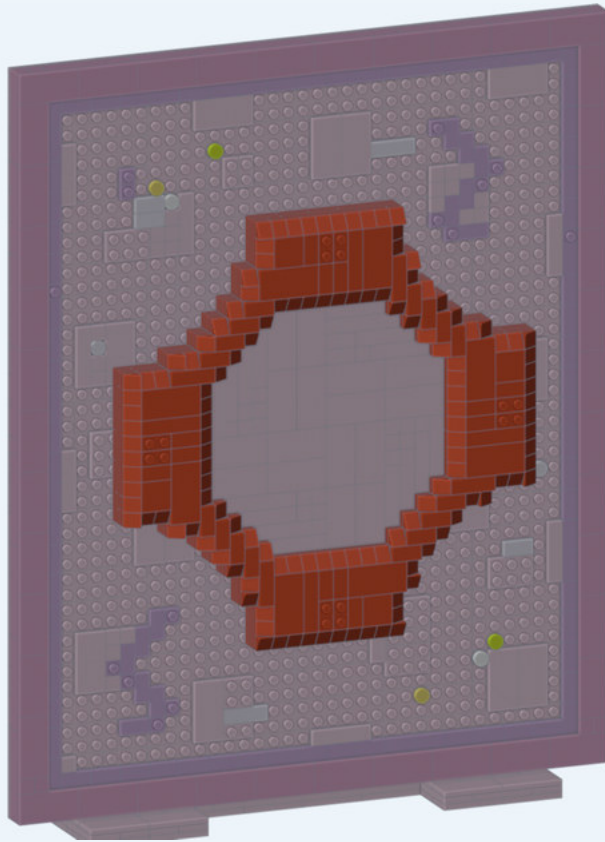

250 / Rear collar detail

Slide the rear half bush onto the axle. Leave about 0.4 mm between the collar and the last bearing. The axle should turn without clamping the support.

Turn the logo gently through a full circle. If it binds, release the collars slightly. Do not force it.

Made to move.

A full turn

The red wheel should clear the picture and frame all the way around. Keep both pink collars a little clear of the fixed bearings.

Lift by the support

Use the feet and rear stand while supporting the frame. Keep the portrait on a level desk or shelf.

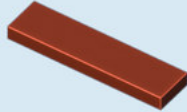

1,606 pieces. Same ordered design.
